COURSE OVERVIEW

Join us in Miami for this practical and clinically relevant meeting for the entire head and neck cancer community. Our multidisciplinary faculty of internationally renowned experts will provide the most up-to-date information on imaging, personalized medicine, radiation, medical oncology, and ablative and reconstructive surgery. Interactive and case-based sessions will review advances in immunotherapy, surgical procedures for the skull, neck, tongue, and skin, robotic surgery, functional and esthetic reconstruction of hard and soft tissue, and more.

LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

- Review the changing epidemiology in head and neck surgery
- Outline the critical aspects of multidisciplinary evaluation, treatment, and follow-up in the management of patients with head and neck malignancies
- Explain new immunotherapy treatment options for head and neck cancer management
- Discuss emerging therapies that provide a rationale for ongoing and future clinical trials
